

# Understanding Adolescent Sexuality

The need to focus on the transition  
from childhood to adolescence living  
with HIV

# An exploration of the psychosocial issues

- Do standard Prevention Programmes and messages discriminate?
- Is there a difference between HIV prevention and AIDS prevention?
- Who teaches the adolescent about puberty and being positive?

# Psychosocial issues of positive adolescents

- What are the preparations to disclose or not to disclose ones status?
- What are the issues of Adolescent sexual and reproductive health information and messages around being positive?

# Medicosocial issues of adolescents living with HIV and AIDS

- With pediatrics for CLWHA and standard public systems for adults, what is the health care mechanism that deals specifically with the ALWHA and their transition?

# Understanding Adolescent Sexuality

- How can we promote the health and sexuality of an adolescent born with HIV?
- How do we help them cope with the transition?

What's the importance of promoting the health and sexuality of adolescents born or living with HIV?
