

**Annette SOHN, MD, Assistant Professor, Division of Pediatric Infectious Diseases, University of California, San Francisco**

***“Keeping up with the kids: paediatric treatment issues”***

Dr. Annette Sohn is based in Ho Chi Minh City, Vietnam, where she directs a paediatric HIV research programme in collaboration with local partners, and acts as the Vietnam Country Representative for the University of California, San Francisco’s Institute for Global Health. Her projects there have included studies of diagnostic and monitoring testing in HIV-exposed infants, stigma and discrimination experienced when accessing prevention of mother-to-child transmission services, and contraception and reproductive health outcomes of HIV-positive women.

Dr. Sohn is a member of the American Foundation for AIDS Research (amFAR) TREAT Asia Steering Committee Pediatric Network, and their Pediatric HIV Observational Database working group. She is also a technical advisor to the U.S. President’s Emergency Plan for AIDS Relief branch in Vietnam, assisting in-country programmes on coordination, protocols and capacity-building for scale-up of their comprehensive paediatric antiretroviral treatment programmes.
